Summary

Full-Stack Engineer who ships production SaaS end to end — multi-tenant PostgreSQL schemas, typed REST and server-action APIs, React/Next.js interfaces, background job pipelines, payment and messaging integrations, LLM-driven automation, and the Docker/Nginx/Cloudflare infrastructure underneath. Sole technical owner of two live platforms at Exitech (an AI content & SEO SaaS for publishers and an operations platform for a US services business) and builder of SehatDoc and SehatLab, healthcare products for clinics and diagnostic labs. Equally comfortable as the single technical point of contact — I run the client meetings, turn feedback into scoped roadmaps, and write the documentation the system runs on.

Experience

Exitech Islamabad, Pakistan (Remote)
Full-Stack Engineer & AI Automation Engineer *Jul 2026 – Oct 2026*

- Sole engineer and **client-facing technical owner** of two production SaaS platforms — **PublisherOS** (multi-tenant AI content & SEO platform) and **Zyrean** (operations platform for a US services business): ran the requirement and milestone meetings, delivered **5 milestones** with sign-off evidence, and authored the architecture and deployment documentation both platforms run on.
- Designed a multi-tenant **Supabase/PostgreSQL** architecture with **222 versioned migrations** and **Row Level Security** per organization, verified by an automated RLS/trigger suite run against production before each release.
- Built an **AI content generation engine** on the **OpenAI API** — outline planning, sectioned drafting, competitor analysis, and a **RAG research agent** — behind a **35+ handler background worker pipeline** with retry, timeout, and idempotency contracts under test.
- Architected Zyrean as a server-first **Next.js 16 / React 19** app on **Prisma 7** with **77 data models** and **9 state machines**, delivering the full money path: **Authorize.Net** payments, refunds, settlement, commissions, and payout batching.
- Integrated **Stripe**, the **SEMrush API**, **WordPress REST**, **Google Analytics**, and **Twilio SMS**, and owned the infrastructure — **Docker**, **Nginx** with TLS, **Cloudflare** DNS/CDN/SSL, **Coolify/DigitalOcean**, and **40+ regression suites** with Playwright.

RippleBerry Tech Islamabad, Pakistan
Full-Stack Engineer *Jan 2026 – Jul 2026*

- Architected and developed full-stack web applications — including **ERP and CRM platforms** (LuxeLinen ERP, Kudon CRM) — using React, Next.js, TypeScript, Node.js, and PostgreSQL.
- Delivered core **ERP and CRM modules**: inventory and sales per branch, invoicing and PDF receipts, lead and sales pipelines, role-based access control, and reporting dashboards for operations teams.
- Built and maintained **Laravel (PHP)** backend services — MVC architecture, Eloquent ORM models and migrations, middleware, queued jobs, and Blade templating — against MySQL databases.
- Integrated **Daily.co** for real-time in-app video calling — room provisioning, secure meeting tokens, scheduled sessions, participant controls, and call recording.
- Designed robust REST APIs across Node.js and Laravel stacks, engineered responsive UIs from Figma designs, and managed end-to-end deployments through modern CI/CD pipelines.

Arch Technologies Remote
AI Engineer *Jan 2024 – Mar 2024*

- Architected and deployed Retrieval-Augmented Generation (RAG) pipelines using LangChain and OpenAI APIs.
- Fine-tuned Large Language Models (LLMs) to improve domain-specific accuracy and context retention.
- Developed **machine learning** models end to end — data preprocessing, feature engineering, training, hyperparameter tuning, and evaluation against held-out benchmarks.
- Designed and managed the **database systems** behind the ML pipelines and optimized secure, scalable model deployments using Docker and AWS.

Selected Projects

PublisherOS — Multi-Tenant AI Content & SEO SaaS
React 19, Vite, Node 22, Express 5, TypeScript, Supabase/PostgreSQL, OpenAI, Stripe

- Multi-tenant publisher workspace for planning, AI-generating, reviewing, and publishing content to client WordPress sites, with billing, plans, AI metering, analytics, client approvals, and platform admin around it.
- Typed npm-workspaces monorepo (frontend / backend / shared zod schemas) with TanStack Query, React Router 7, Tailwind 4, and a repository–service–route layering rule enforced across 80+ API modules.

Zyrean — Operations Platform (Customer / Business / Partner OS)
Next.js 16, React 19, Prisma 7, PostgreSQL, Supabase Auth, Authorize.Net, Twilio

- Server-first operations platform covering inquiries, quotes, bookings, specialist assignment, payments, commissions, payouts, support tickets, and audit history across three connected operating layers sharing one canonical data core.
- Role-based access over Supabase Auth with middleware session handling, Supabase Storage uploads, timezone-correct scheduling, and PDF/Excel invoice and reporting exports (jsPDF, SheetJS).

SehatDoc — Clinic & Practice Management Platform

Next.js 16, React 19, Node.js, Express 5, Prisma, PostgreSQL, WebSockets, AWS S3, .NET 8 / Avalonia, DigitalOcean, PM2

- Cloud platform for doctors, receptionists, and pharmacy staff — patients/EMR, appointments and live queue, prescriptions with QR verification, billing and installments, pharmacy POS and inventory, staff/HR, and WhatsApp reminders.
- Five apps (portal, admin, booking directory, marketing, API) with ~345 endpoints and 80 Prisma models, deployed on DigitalOcean behind Nginx and Cloudflare with PM2, plus a native Windows client in .NET 8 / Avalonia.

SehatLab — Laboratory Information System

Node.js, REST APIs, webhooks, SehatDoc integration

- Cloud LIS for diagnostic labs — request intake and sample log, configurable test panels, two-stage result verification, branded report templates, and billing.
- Built the clinic ↔ lab integration: connection handshake with origin allow-list and platform keys, test ordering from the lab catalogue, and verified reports synced straight into the doctor's SehatDoc portal.

LuxeLinen ERP — Multi-Branch Retail ERP

React 19, TypeScript, Vite, TanStack Query, Node 20, Express, TypeORM, PostgreSQL, AWS S3

- ERP for a multi-branch luxury linen retailer — users, roles and permission matrix, branches, clients, branch sales with Excel import and PDF receipts, expenses, and branch performance dashboards.
- JWT access/refresh tokens with rotation and revocation, S3 branch-logo uploads, ~36 REST endpoints over 15 TypeORM entities and 14 migrations.

Kudon CRM (KES) — Sales & Lead Management

React 19, TypeScript, Vite, TanStack Query, Tailwind 4, Laravel API

- Lead-to-deal-to-purchase-order CRM for an engineering company with Kanban and table pipelines, AI-generated proposals, documents, and two-way SSO with the company's POMS system; reduced lead tracking time by 20% across 10,000+ records.

KnowFlow — Mentorship Marketplace

React 19, Redux Toolkit / RTK Query, Socket.io, Stripe Connect, Daily.co, Zoom SDK, Node.js

- Two-sided marketplace connecting knowledge seekers with expert guides — timezone-aware booking, in-app video sessions, real-time chat over Socket.io, Stripe payments, wallets, and Stripe Connect payouts, plus an admin back office.

Voxel Patient Portal — Medical File Transfer

React 19, TypeScript, Vite, Tailwind 4, Laravel Sanctum

- Secure portal for non-DICOM patient documents — Sanctum auth with email-OTP 2FA, patient records, drag-and-drop document folders by type, and Admin / Staff / Auditor role management.

Technical Skills

Languages: TypeScript, JavaScript (ES2023+), PHP, SQL, Python, HTML5, CSS3

Frontend: React 19, Next.js 16 (App Router, Server Components, Server Actions), Vite, React Router, TanStack Query, Redux Toolkit, Tailwind CSS v4, Radix UI, shadcn/ui, React Hook Form, Zod, Figma-to-code

Backend: Node.js 22, Express 5, NestJS, Laravel (PHP), Prisma, TypeORM, Eloquent, REST API design, background workers & job queues, state machines, webhooks, idempotency & retry design, WebSockets/Socket.io

Databases: PostgreSQL, Supabase, Row Level Security, MySQL, MongoDB, SQLite, multi-tenant schema design, indexing, query optimization, ledger systems

AI & ML: OpenAI API, LangChain, RAG pipelines, LLM fine-tuning, prompt engineering, multi-step agents, AI usage metering & cost control, content-safety guardrails

Payments & Integrations: Stripe & Stripe Connect, Authorize.Net, commissions & payouts, SEMrush, DataForSEO, WordPress REST, Google Analytics, Twilio, WhatsApp, Resend, Postmark, Zoom SDK, Daily.co, AWS S3

Auth & Security: Supabase Auth, Laravel Sanctum, OAuth 2.0, JWT (jose), 2FA/OTP, RBAC, session middleware, Helmet/CORS, HTML sanitization, audit trails

Cloud & DevOps: Docker, Docker Compose, Nginx, Cloudflare, Coolify, DigitalOcean, AWS, Vercel, Render, PM2, CI/CD, Git/GitHub, npm-workspaces monorepos

Testing & Data: Playwright, Vitest, Jest, Node test runner, regression & contract suites, SheetJS, ExcelJS, jsPDF, PDF/DOCX ingestion, Sharp

Professional: Client requirement gathering, milestone-based delivery & sign-off, technical documentation, scope & roadmap authoring, end-to-end solo technical ownership

Education

FAST National University — Islamabad, Pakistan
BS Computer Science — *Graduated 2026*

The City School — Jinnah Campus — Hyderabad, Pakistan
A Levels — Physics, Chemistry, Mathematics — *2 A*, 1 A*
